

Vision Eye Institute Chatswood

Level 3, 270 Victoria Avenue, Chatswood NSW 2067 · Phone 02 9424 9999

drsimonchen.com.au

Name

Date

Time

Vision Eye Institute will contact you to confirm your appointment.

1 Before

- ☐ Referral, if not already sent
- ☐ Medicare, concession, DVA and health fund details
- ☐ Glasses and old prescriptions
- ☐ Previous scans and reports
- ☐ Medicines, eye drops and allergies
- ☐ Medical and surgical history, including laser eye surgery
- ☐ Sunglasses and a lift home

2 At the appointment

Dr Chen will discuss your symptoms, examine your eyes and consider scan findings alongside your priorities.

He will explain your options, their benefits and risks, and what recovery may involve.

You will have time to ask questions. For some eyes, monitoring may be more appropriate than surgery.

3 After

Dilated vision can be blurred and light-sensitive for several hours.
Do not drive while your vision is affected.

The clinic team will explain treatment arrangements and follow-up.

A detailed report keeps you and your referring clinicians informed.

My symptoms

When they began; reading, driving, glare, work.

My questions

- 1 What is happening in my eye?
- 2 What are the options and trade-offs?
- 3 What happens next?

Notes and next steps

Which line?

M1 Metro Macquarie Park, Epping; Crows Nest, North Sydney, CBD

T9 Northern CBD, Strathfield, Epping, Hornsby

T1 North Shore Hornsby, Berowra; North Sydney, CBD, Parramatta

Central Coast & Newcastle only some services stop; check your train

Look for this entrance

270 Victoria Avenue. Take the lift to Level 3. The day surgery is in the same building, on Level 4.

Timetables and platforms can change during trackwork. Plan your journey at drsimonchen.com.au/visit

If your vision suddenly changes

New flashes, a sudden increase in floaters, a curtain or sudden vision loss need urgent assessment. Call the clinic; if closed or unavailable, attend the nearest hospital emergency department.
